Use Case Flow - Authenticate User

Goal	Authenticate User
Actor	Student, Recruiter, Admin (Placement Cell)
Main flow	1. User enters their registered email and password. 2. System validates the credentials against stored records. 3. System checks the user's role and grants access to the corresponding dashboard. 4. System creates a session and redirects the user to their dashboard. 5. Use case ends successfully.
Alternate Flow	Invalid Credentials At Step 2, if authentication fails: 2a. System cannot match the entered credentials to a valid account. a) System displays an error message without indicating whether the email or password was wrong. b) User re-enters credentials. c) After 5 failed attempts, the account is temporarily locked and the user is notified by email.

Use Case Flow - Apply to Internship Listing

Goal	Apply to Internship Listing
Actor	Student, Recruiter
Main flow	1. Student browses internship listings and selects one to view. 2. System checks the student's eligibility against the listing's configured criteria. 3. Student attaches a resume and submits the application. 4. System records the application and sets its status to “Applied.” 5. System sends a confirmation email to the student. 6. Use case ends successfully.
Alternate Flow	Ineligible Student At Step 2, if the student does not meet the listing's eligibility criteria: 2a. System disables the “Apply” option and displays the unmet criteria. a) Student is shown other listings they are eligible for. b) Use case terminates.

Use Case Flow - Take Aptitude Test

Goal	Take Aptitude Test
Actor	Student
Main flow	1. Student selects a scheduled or practice aptitude test. 2. System starts a countdown timer and loads randomized questions. 3. Student answers the questions; system auto-saves responses periodically. 4. Student submits the test before time runs out. 5. System auto-grades the test and displays the score. 6. Use case ends successfully.
Alternate Flow	Time Expires Before Submission At Step 4, if the timer reaches zero before the student submits: 4a. System automatically submits the test using the answers saved so far. a) System auto-grades the partial submission. b) Student is notified that the test was auto-submitted due to time expiry.

Use Case Flow - Recruiter Reviews Applicants

Goal	Recruiter Reviews Applicants
Actor	Recruiter, Student
Main flow	1. Recruiter opens the list of applicants for a listing. 2. Recruiter reviews each applicant's profile, resume, and test score. 3. Recruiter updates an applicant's status (Shortlisted, Interview, Offered, Rejected). 4. System notifies the student of the status change by email. 5. Use case ends successfully.
Alternate Flow	Offer Accepted At Step 3, if the recruiter marks an applicant as “Offered” and the student accepts: 3a. System marks the student's status as “Placed.” a) System automatically closes the student's other pending applications. b) Recruiter is notified that the position has been filled.
